

Mental Health and Wellbeing Policy

Policy Statement

At St Thomas of Canterbury School we strive to give all children the best possible education, helping them *to be the best they can be*. We work in partnership with parents to enable all children to develop their talents within a Christian environment of love, faith, justice and forgiveness. It is our vision that all children are entitled to develop to their fullest potential academically, socially, emotionally, enabling each child to grow in confidence and be able to fully participate in everything that goes on in the wider community with confidence. It is widely recognised that a child's emotional health and well-being influences their cognitive development and learning, as well as their physical and social health and their mental well-being in adulthood. The Department for Education recognises that, in order to help their pupils, succeed: schools have a role to play in supporting them to be resilient and mentally healthy.

Mental health is a state of well-being in which every individual realises his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community. (World Health Organization)

At our school, we aim to promote positive mental health for every child, parent / carer and staff. We pursue this aim using both universal, whole school approaches and specialised, targeted approaches aimed at identified vulnerable pupils and families.

In addition to promoting positive mental health and well-being, we aim to recognise and respond to need as it arises. National statistics show that in an average classroom, three children will be suffering from a diagnosable mental health issue. We recognise as a school that by developing and implementing practical, relevant and effective mental health procedures we can promote a safe and stable environment for children affected both directly and indirectly by mental ill health.

This policy describes the school's approach to promoting positive mental health and well-being. It is intended as guidance for all staff including non-teaching staff and governors. It should be read in conjunction with our medical policy in cases where a pupil's mental health and well-being overlaps with, or is linked to, a medical issue and the SEND policy where a pupil has an identified Special Educational Need and the Safeguarding Policy in relation to prompt action and wider concerns of vulnerability.

The policy aims to:

- Promote positive mental health and well-being in all pupils and staff
- Increase understanding and awareness of common mental ill health
- Alert staff to early warning signs of poor mental health and well-being

- Provide support to staff working with young people with mental ill health and low well-being
- Provide support to pupils suffering mental ill health and their peers and parents/carers

Lead Members of Staff

All staff have a responsibility to promote the mental health of pupils.

Staff with a specific, relevant remit include:

- Mrs. Tucker and Mr. Feasey - Designated Child Protection / Safeguarding Officer
- Ms. Marc - Mental Health and Emotional Wellbeing Lead
- Ms O'Donovan – Mental Health First Aider
- Ms Rushton - Mental Health First Aider
- Ms Mahmood - Mental Health First Aider
- Ms Marc - CPD Lead
- Ms. O'Donovan - Head of PSHE
- Ms Mahmood- Well-Being Leader

Any member of staff who is concerned about the mental health or wellbeing of a pupil should speak to the Mental Health Lead in the first instance. If there is a fear that the pupil is in danger of immediate harm then the normal child protection procedures should be followed with an immediate referral to the Designated Child Protection Office staff or the head teacher. If the pupil presents a medical emergency then the normal procedures for medical emergencies should be followed, including alerting the first aid staff and contacting the emergency services if necessary.

Where a referral to CAMHS is appropriate, this will be led and managed by Ms Marc, Mental Health Lead. Guidance about referring to CAMHS is provided on this link <https://www.swlstg.nhs.uk/our-services/find-a-service/service/merton-camhs>

Support Plans

Support Plans for children with mental health concerns may take the form of:

- SEN Support Plan (SEN Plan)
- Education Health Care Plan (EHCP)
- Health Care Plan (HCP)

This should be drawn up involving the pupil, the parents and relevant health professionals. This can include:

- Details of a pupil's condition
- Special requirements and precautions
- Medication and any side effects
- What to do, and who to contact in an emergency

Teaching about Mental Health and Wellbeing

The skills, knowledge and understanding needed by our pupils to keep themselves and others physically and mentally healthy and safe are included as part of our developmental PSHE curriculum.

The specific content of lessons will be determined by the specific needs of the cohort we're teaching but there will always be an emphasis on enabling pupils to develop the skills, knowledge, understanding, language and confidence to seek help, as needed, for themselves or others.

As a faith school, Religious Education is at the heart of our curriculum, with spiritual growth central to daily school life. Periods of reflection are built within the day for Children and Staff.

Our Science and PSHE (JIGSAW scheme) curriculum ensures that we teach mental health and emotional wellbeing issues in a safe and sensitive manner which helps rather than harms.

Signposting

We will ensure that staff, pupils and parents are aware of sources of support within school and in the local community. What support is available within our school and local community, who it is aimed at and how to access it is outlined in Appendix I.

We will display relevant sources of support in communal areas, classrooms and school website. It will regularly highlight sources of support to pupils within relevant parts of the curriculum. Whenever we highlight sources of support, we will increase the chance of pupil help-seeking by ensuring pupils understand:

- What help is available
- Who it is aimed at
- How to access it
- Why to access it
- What is likely to happen next

Warning Signs

School staff may become aware of warning signs which indicate a pupil is experiencing mental health or emotional wellbeing issues. These warning signs should always be taken seriously and staff observing any of these warning signs should communicate their concerns with Mr Feasey, (Head Teacher), Mrs. Tucker (Safeguarding Lead) or Ms Marc, our Mental Health and Emotional Wellbeing Lead.

Possible warning signs include:

- Physical signs of harm that are repeated or appear non-accidental
- Changes in eating / sleeping habits
- Increased isolation from friends or family, becoming socially withdrawn
- Changes in activity and mood
- Lowering of academic achievement
- Talking or joking about self-harm or suicide
- Abusing drugs or alcohol
- Expressing feelings of failure, uselessness or loss of hope
- Changes in clothing – e.g. long sleeves in warm weather
- Secretive behaviour
- Skipping PE or getting changed secretly
- Lateness to or absence from school
- Repeated physical pain or nausea with no evident cause
- An increase in lateness or absenteeism

Managing disclosures

A pupil may choose to disclose concerns about themselves or a friend to any member of staff, so all staff need to know how to respond appropriately to a disclosure.

If a pupil chooses to disclose concerns about their own mental health or that of a friend to a member of staff, the member of staff's response should always be calm, supportive and non-judgemental.

Staff should listen, rather than advise and our first thoughts should be of the pupil's emotional and physical safety rather than of exploring 'Why?'

All disclosures should be recorded on MyConcern. This record should include:

- Date
- The name of the member of staff to whom the disclosure was made
- Main points from the conversation
- Agreed next steps

This information should be shared with the mental health lead, Ms. Marc who will offer support and advice about next steps.

Confidentiality

We should be honest with regards to the issue of confidentiality. If it is necessary for us to pass our concerns about a pupil on then we should discuss with the pupil:

- Who we are going to talk to
- What we are going to tell them
- Why we need to tell them

We always report disclosures to the Mental Health and Emotional Wellbeing Lead, Ms. Marc. This helps to safeguard our own emotional wellbeing as we are no longer solely responsible for the pupil, it ensures continuity of care in our absence and it provides an extra source of ideas and support. We should explain this to the pupil and discuss with them who it would be most appropriate and helpful to share this information with.

Parents should be informed if there are concerns about their mental health and wellbeing and pupils may choose to tell their parents themselves.

If a child gives us reason to believe that there may be underlying child protection issues, parents should not be informed, but the Safeguarding Lead, Mrs. Tucker or Mr. Feasey (Head teacher) must be informed immediately.

Working with Parents

Where it is deemed appropriate to inform parents, we need to be sensitive in our approach. Before disclosing to parents we should consider the following questions (on a case by case basis):

- Can the meeting happen face to face? This is preferable.
- Who should be present? Consider parents, the pupil, other members of staff.
- What are the aims of the meeting?

It can be shocking and upsetting for parents to learn of their child's issues and many may respond with anger, fear or upset during the first conversation. We should be accepting of this (within reason) and give the parent time to reflect.

We should always highlight further sources of information and give them leaflets to take away where possible as they will often find it hard to take much in whilst coming to terms with the news that you're sharing. Sharing sources of further support aimed specifically at parents can also be helpful too e.g. parent helplines and forums.

We should always provide clear means of contacting us with further questions and consider booking in a follow up meeting or phone call right away as parents often have many questions as they process the information. Finish each meeting with agreed next step and always keep a brief record of the meeting on the child's confidential record.

Working with All Parents

Parents are often very welcoming of support and information from the school about supporting their children's emotional and mental health. In order to support parents we will:

- Highlight sources of information and support about common mental health issues on our school website
- Ensure that all parents are aware of who to talk to, and how to get about this, if they have concerns about their own child or a friend of their child
- Make our mental health policy easily accessible to parents
- Share ideas about how parents can support positive mental health in their children through our regular information evenings
- Keep parents informed about the mental health topics their children are learning about in PSHE and share ideas for extending and exploring this learning at home

Supporting Peers

When a pupil is suffering from mental health issues, it can be a difficult time for their friends. Friends often want to support but do not know how. In the case of self-harm or eating disorders, it is possible that friends may learn unhealthy coping mechanisms from each other. In order to keep peers safe, we will consider on a case by case basis which friends may need additional support. Support will be provided either in one to one or group settings and will be guided by conversations by the pupil who is suffering and their parents with whom we will discuss:

- What it is helpful for friends to know and what they should not be told
- How friends can best support
- Things friends should avoid doing / saying which may inadvertently cause upset
- Warning signs that their friend help (e.g. signs of relapse)

Additionally, we will want to highlight with peers:

- Where and how to access support for themselves
- Safe sources of further information about their friend's condition
- Healthy ways of coping with the difficult emotions they may be feeling

Support for Staff

As a minimum, all staff will receive regular training about recognising and responding to mental health issues as part of their regular child protection training in order to enable them to keep pupils safe.

Training opportunities for staff who require more in-depth knowledge will be considered as part of our performance management process and additional CPD will be supported throughout the year where it becomes appropriate due developing situations with one or more pupils.

Where the need to do so becomes evident, we will host twilight training sessions for all staff to promote learning or understanding about specific issues related to mental health.

St Thomas of Canterbury Catholic Primary school

Suggestions for individual, group or whole school CPD should be discussed with Ms Marc, our CPD Coordinator who can also highlight sources of relevant training and support for individuals as needed.

The school subscribes to an Employee Assistance Programme. All members of staff have a free 24hrs access to this service. In recognition of the impact of periods of high demand on staff energy the school uses a variety of strategies to provide relief, e.g. Low Key Week around parents' evening, shared breakfast.

Policy Review

This policy will be reviewed every 3 years as a minimum. It is next due for review in March 2022.

This policy will always be immediately updated to reflect personnel changes.

Appendix I: Further information and sources of support about common mental health issues

Prevalence of Mental Health and Emotional Wellbeing Issues

- 1 in 10 children and young people aged 5 - 16 suffer from a diagnosable mental health disorder - that is around three children in every class.
- Between 1 in every 12 and 1 in 15 children and young people deliberately self-harm.
- There has been a big increase in the number of young people being admitted to hospital because of self-harm. Over the last ten years this figure has increased by 68%.
- More than half of all adults with mental health problems were diagnosed in childhood. Less than half were treated appropriately at the time.
- Nearly 80,000 children and young people suffer from severe depression.
- The number of young people aged 15-16 with depression nearly doubled between the 1980s and the 2000s.
- Over 8,000 children aged under 10 years old suffer from severe depression.
- 3.3% or about 290,000 children and young people have an anxiety disorder.
- 72% of children in care have behavioural or emotional problems - these are some of the most vulnerable people in our society.

Below, I have sign-posted information and guidance about the issues most commonly seen in school-aged children. The links will take you through to the most relevant page of the listed website. Some pages are aimed primarily at parents but they are listed here because we think they are useful for school staff too.

Support on all of these issues can be accessed via Young Minds (www.youngminds.org.uk),

Mind (www.mind.org.uk) and (for e-learning opportunities) Minded (www.minded.org.uk).

Self-harm

Self-harm describes any behaviour where a young person causes harm to themselves in order to cope with thoughts, feelings or experiences they are not able to manage in any other way. It most frequently takes the form of cutting, burning or non-lethal overdoses in adolescents, while younger children and young people with special needs are more likely to pick or scratch at wounds, pull out their hair or bang or bruise themselves.

Depression

Ups and downs are a normal part of life for all of us, but for someone who is suffering from depression these ups and downs may be more extreme. Feelings of failure, hopelessness, numbness or sadness may invade their day-to-day life over an extended period of weeks or months, and have a significant impact on their behaviour and ability and motivation to engage in day-to-day activities.

Anxiety, panic attacks and phobias

Anxiety can take many forms in children and young people, and it is something that each of us experiences at low levels as part of normal life. When thoughts of anxiety, fear or panic are repeatedly present over several weeks or months and/or they are beginning to impact on a young person's ability to access or enjoy day-to-day life, intervention is needed.

Obsessions and compulsions

Obsessions describe intrusive thoughts or feelings that enter our minds which are disturbing or upsetting; compulsions are the behaviours we carry out in order to manage those thoughts or feelings. For example, a young person may be constantly worried that their house will burn down if they don't turn off all switches before leaving the house. They may respond to these thoughts by repeatedly checking switches, perhaps returning home several times to do so. Obsessive compulsive disorder (OCD) can take many forms – it is not just about cleaning and checking.

Suicidal feelings

Young people may experience complicated thoughts and feelings about wanting to end their own lives. Some young people never act on these feelings though they may openly discuss and explore them, while other young people die suddenly from suicide apparently out of the blue.

Eating problems

Food, weight and shape may be used as a way of coping with, or communicating about, difficult thoughts, feelings and behaviours that a young person experiences day to day. Some young people develop eating disorders such as anorexia (where food intake is restricted), binge eating disorder and bulimia nervosa (a cycle of bingeing and purging). Other young people, particularly those of primary or preschool age, may develop problematic behaviours around food including refusing to eat in certain situations or with certain people. This can be a way of communicating messages the child does not have the words to convey.
